

STOP

**DO NOT ATTEMPT
TO JUSTIFY THIS
VEHICLE**

Congratulations - your vehicle is contributing massively to climate change.

European leaders agree that climate change will cost \$100 billion a year by 2020. In choosing to drive this car you're unnecessarily accelerating the rate of climate change and ensuring the cost to taxpayers will be even greater.

You're damaging the planet & creating a terrible legacy for the world's children - *There's no justification.*

Statistically, you're also creating additional danger on our roads.
